Am sorry to send you such a small order, but we have just a small place in our back yard to grow vegetables. We like your seeds very, very much. I believe every seed comes up that we plant. I wrote a friend in West Virginia two years ago how well we liked your seeds and for her to try them. Her answer was: Am well acquainted with Alneer's seeds, have been using them for years. Hope to give you a larger order next time.

Sweet Corn

Golden Cross Bantam

Wilt Resistant—High Yield—Uniform

We recommend this new hybrid sweet corn for places where Stewart's disease (wilt) makes it impossible to grow ordinary varieties of sweet corn. This corn which is the product of crossing two pure lines is not only resistant to bacterial wilt (Stewart's disease) but produces larger crops of beautiful ears. The ears have 10 to 14 rows of golden yellow kernels, uniform in length (about 8 in.) and of excellent quality. Matures a week later than Golden Bantam, the whole crop ripening at about the same time.

This crossed seed was produced by the controlled pollination of two inbred parents and will produce the true Golden Cross Bantam. Seed from the crop cannot be saved as it will break down. The cross has to be made each year. Pkt. 10c, 1/2 lb. 25c, lb. 40c, 2 lbs. 75c, 5 lbs. \$1.50, postpaid.

Tomatoes do best in warm, moderately rich soil. Sow seeds early in March in hot bed or house, in shallow boxes. About May 15 to 20 in this latitude the plants should be set out in the open ground, in rows four feet apart each way. All seeds we offer are from critically selected specimens of fruit and must prove of the greatest value to the planter.

Pritchard or Scarlet Topper

Pritchard or Scarlet Topper

As a result of the extensive experiments conducted by the U. S. Dept. of Agriculture in their quest for a perfect disease, wilt and rust resisting tomato, several fine varieties have been developed; but, it is believed that this, their newest introduction is the most perfect sort yet produced. An extra-early, large, smooth, and extremely solid Tomato of an intense scarlet color. Most productive and very attractive. Of a solidity that is truly remarkable, with very small seed pockets and no core. Its productiveness, particularly on rich soil, is amazing, and individual plants will bear 70 to 80 fruits each. It will yield 15 tons and more per acre. Pkt. 5c, oz. 25c, 1/4 lb. 80c, 1/2 lb. \$1.50, lb. \$2.75.

Pure scarlet in color, globular in shape, extra large, smooth, early, beautiful in appearance and very productive. Above all, the quality is most excellent. Pkt. 5c, oz. 25c, 1/4 lb. 80c, 1/2 lb. \$1.50, lb. \$2.75.

Bonny

John Baer

A remarkable new variety of the extra early red or scarlet type. Not as early as Earliana, yet there are only a few days' difference, and John Baer yields a much heavier crop of larger, more uniform and more attractive fruits that in total it makes a much more profitable crop to grow than any other extra early variety. Pkt. 7c, oz. 25c, 1/4 lb. 80c, 1/2 lb. \$1.50, lb. \$2.90.

Earliest June Pink This is a variety, similar in habit to the famous "Earliana," differing only in its color which is pink in color instead of red. The plant is neat and compact, branching freely, with fruit hanging in clusters. Under exactly the same conditions as Earliana, the June Pink yielded exactly the same results. Earliness, blight resisting, long and heavy yielding, are its main characteristics. An excellent shipper on account of its reasonably tough skin. Will take a place at the head of the pink sorts. Pkt. 7c, oz. 25c, 1/4 lb. 80c, 1/2 lb. \$1.50, lb. \$2.90.

The color is brilliant scarlet-crimson, untinged with purple, and ripens up almost completely to the stem. The Crimson King, like the Ponderosa, is almost seedless. The flesh is firm and meaty, solid as beefsteak, and of superb quality. It is enormously prolific and early for so large a tomato. Pkt. 10c, oz. 30c, 1/4 lb. \$1.10, 1/2 lb. \$2.10, lb. \$4.00.

RELIABLE FIELD AND FARM SEEDS

Nothing is more important to the farmer than that the seed he sows is pure and clean. The seed should also be plump, and well ripened, so as to insure a good stand. First class, thoroughly re-cleaned seed, even though considerably more costly in the beginning, is really much cheaper in the end than the light chaffy grades generally sold at much lower prices, even if the latter is free from weed seeds.

Prices subject to change without notice, owing to the fluctuations of the market. Write for prices on large quantities.

CERTIFIED HYBRID SEED CORN

Our hybrids will be certified seed. This means that the inbred parentage has been grown under the inspection of the DEPARTMENT of AGRICULTURE.

HYBRID CORN assures the grower of a larger yield, stronger stalk and root system; better quality grain, much more resistance to heat, cold, drought and various corn diseases.

A good HYBRID CORN should give an increased yield of 20% over regular corn. We will furnish HYBRID seed of proven adaptability to your section.

STANDARD PLATE GRADE: 1 lb. 40c, 4 lbs. \$1.35, 8 lbs. \$2.35 Post-paid; by express or freight NOT PREPAID, ½ bu. \$4.20, 1 bu. \$8.00.

Alneer's Golden Champion The great prize-winning corn. Now the most popular and most uniformly distinct type of Yellow Dent Corn. Fifty years of careful selection has resulted in remarkable evenness in appearance of ears. It is more accurately described as follows: Ears 9 to 10 inches long, 7 inches around, 18 to 24 rows with narrow space between rows; deep grains with small cob well filled at butt and tip. We offer a very choice selection of seed grown from pedigree seed selections for years. It has won first prizes in competition. Price shelled, qt. 45c, ¼ bu. 90c, ½ bu. \$1.75, bu. \$3.25.

Pride of Illinois Ears are borne uniformly at about four feet from the ground, high enough to get the sun and air, low enough to be protected from windstorms. The ears are large, 10 to 12 inches long, nearly cylindrical, holding their size well to the end, are well rounded or capped over at both ends and have that well groomed appearance of thoroughbred corn. The fine shaped grains, which are set in straight rows, are quite deep and broad at the germ end, thus making a solid or heavy ear, and they are of such rich yellow color and uniform size that it is surely the handsomest corn we have ever seen. Qt. 45c, ¼ bu. 90c, ½ bu. \$1.75, bu. \$3.25.

Reid's Large Yellow Dent Grows to a good size, and is pronounced one of the best varieties known and a great yielder. A fine sort. Qt. 45c, ¼ bu. 90c, ½ bu. \$1.75, bu. \$3.25.

Aster growers have been troubled with pests of recent years. Aster Yellows is also an enemy. This has been found to be transferred to the plants by tiny insects called leaf hoppers. The only means to overcome this is to grow the plants under a cheesecloth cover.

It is the yellowest of all Roses. 25c.
